

# Value-Based Formulary

Effective 1/1/08

**How To Use This Formulary.** Always take this Formulary list with you to your doctor, and ask for the lowest Tier drug(s) that will treat your needs.

1. Go to the 4-page alphabetical index of drugs starting on page 2.
2. Look up your drug's Tier # (You pay less for drugs in Tiers 1 and 2) and Formulary Category.
3. Look up the alphabetical Formulary Category.
4. Review potential lower cost drug alternatives to discuss with your doctor.
5. **If you do not see your drug listed, then it is automatically covered as a Tier 2 drug unless otherwise excluded by your employer (see explanation under Exclusions, below).**

**Tier 1** drugs include all **generic prescription drugs** (whether listed or not), except those specifically listed under "Exclusions" on page 14. Tier 1 drugs almost always require the **lowest patient copayments**. Brand name versions of generic drugs will cost you much more.

**Tier 2** drugs are **middle copay, preferred brand name prescription drugs**. Not all Tier 2 drugs are listed. Unless a brand name drug is listed in Tier 3 or is excluded, it will normally be considered a Tier 2 drug. Injectables may be covered differently.

**Tier 3** drugs are **the highest copay** non-preferred brand name prescription drugs. Always ask your doctor if there are lower cost alternatives to Tier 3 drugs.

**Exclusions** are the following categories of drugs which are not covered: (1) drugs listed under "Exclusions" on page 14, (2) non-prescription drugs, except those listed in Tier 1, below, (3) newly FDA-approved prescription drugs until evaluated and approved by the Hyde Rx Pharmacy and Therapeutics (P&T) Committee.

**Please note:**

1. This formulary is subject to change without notice by Hyde Rx. For online updates, check [http://www.hyderx.com/KEWi/portalFuncs/category\\_detail.asp?cld=50004837](http://www.hyderx.com/KEWi/portalFuncs/category_detail.asp?cld=50004837) and click on "Preferred Drug Formulary-Members Only."
